SR-1000

Versatile, and always ready to go

Integrated portable DR system

SR-1000 is the portable DR system integrated with the X-ray generator, flat panel detector and the workstation. Independent from mains supply, wireless connection among three parts and compact design enable it to apply in most cases and always ready to go!

WiFi connection technology

WiFi connection among the X-ray generator, flat panel detector and workstation to control exposure as well as data transfer, which largely simplify the operation and improve efficiency.

Mobile controls exposure through WiFi

Battery power supply system

The whole system is powered by battery.

Detachable battery

- A full charge enables over **200 times** exposure at full power and over **300 times** at average power.
- Normal exposure is available even when the power is lower than 20%.
- **10-mins** charging supports **50 times** exposure.

Multiple protection system

More than 20 types of safeguard and auto-diagnosis system, 14 fault codes indication and intelligent error report offer all-round protection to the system.

Reasonable compact design

All-in-one compact design as a kit always allows ready to go.
